Windows Genuine Advantage Notification in Windows XP The WGA validation process validates the present installation of Windows and its license key against the detected and determines if the software was licensed from Microsoft.. If successful in validating Windows, it stores a license file on the PC for future verification.. Despite its name it does not actually evaluate the integrity or security of any computer.

- After successful validation, the regular update download can continue
- If the software decides the instance of Windows does not have a valid license, WGA displays a specific notice to the user and prevents non-critical updates from being downloaded from Microsoft.. WGA Notifications covers and later, with the exception of The ActiveX control checks licenses as well.
